

Sili-Fert P

100% Soluble • 100% Bio-Available

With crude oil prices driving heating costs higher this winter, **Sili-Fert P** offers a smarter, cost-effective way to help crops cope with cold stress.

Formulated with **100% soluble, 100% bio-available silicon and micronutrients**, it strengthens plant structure, improves nutrient uptake, and enhances overall crop performance.

Designed to support **plant tolerance to low temperatures**, Sili-Fert P helps your plants stay stronger, healthier, and more productive through winter.

Advantages

- Biostimulant and micronutrients in 1 product!
- Stronger fruits, leaves and plants
- Enhanced stress resistance
- Higher yield and improved crop quality
- Extremely low application rate
- Lower vulnerability to nutrient imbalance and toxic chemicals in soil and irrigation water
